

Outstanding in the GRC Software Space

Given Sword GRC's commitment to an attainment of 'exceptional' across every aspect of its business, the title of '2022 Most Outstanding GRC Management Software Provider, UK' is well deserved. From continual investment in innovation and the development of a world-class platform that empowers global brands to elevate the value of their governance, risk and compliance management, right through to the unrivalled levels of support and customer care that its customers can rely on, Sword GRC raises the bar.

In today's economy, organizations need agility and resilience in order to navigate change and increasing complexities within risk, governance and compliance. Businesses must be adept at mitigating known risks, dealing with uncertainty and identifying opportunity – balancing risks v rewards and capitalizing on positive risk-taking when there is scope to maximize value. Digital innovation is undeniably an enabler and as market leader in enterprise risk management, Sword GRC's award-winning solution set equips global brands to raise their game; providing reliable risk intelligence that supports strategic decision-making.

For customers within its core markets of aerospace and defence, energy, infrastructure, construction and government, Sword GRC is reinventing the way that risk is approached – pushing risk management best practice up the corporate agenda and elevating its value as part of an organization's digital transformation.

Innovation is part of Sword GRC's 'DNA' – it sees its ongoing investment in new technologies and product development as a foundation from which its customers can maintain their leadership.

Active Risk Manager, Sword GRC's best-in-class risk management platform is trusted by global brands to support pioneering initiatives, including 'mega-projects' of vast scale and scope, entailing immense complexity and with much at stake.

ARM, complete with its Compliance, Policy, Safety and Audit modules is considered the most flexible and configurable solution available, centralizing enterprise-wide or project risk into a 'single view' – providing users with the visibility and depth of insights to put risk management at the heart of strategic and operational decision making.

With a significant investment program across its people, portfolio, and global reach, 2022 and beyond will see Sword GRC

expand its visionary product roadmap, bringing unrivalled new functionality across its software stack for the direct benefit of its customers.

"Whether their focus be on driving major projects or implementing operational improvements, business leaders will have access to dynamic, reliable information on risk, vital for quality decision-making. More intelligent risk management underpins optimized and sustained business performance, not least the agility and resilience that's critical in today's global climate," said Keith Ricketts, VP of Marketing.

"We are proud to uphold robust working relationships with customers as diverse as NASA and the UK Ministry of Defence and are confident in our ability to develop and deliver best-fit risk management solutions that support their business performance and 'outstanding' goals attainment."
